ADI-P Controller for M100 Filtomat Filters – Official Launching

Dear Colleagues and Customers,

We are proud to announce that as of **July 1st, 2019**, the ADI-P Controller, Amiad's new advanced controller, will become our standard controller for Filtomat M100 filters.

The ADI-P Controller will replace our current controllers (hydraulic rinse controller and electronic Filtron 1-10), see below images:

Please note:

- SAP P/N for Filtomat electronic filters will **NOT be changed** but will be updated to accommodate the change.
- SAP P/N for Filtomat hydraulic filters will be closed for sale (see EOL notification).
- Marketing materials (catalogue, price list, drawings & operation manuals) will be available soon.
- There is a minor price increase for the Filtomat with the ADI-P controller compared to the current Filtomat hydraulic configuration.

With regards,

Yael Levine
