# TYPHOON<sup>®</sup>

Tayfur water systems, which was established by Tayfun yazarođlu in 2004 in Izmir, started in 2017, as Tayfur water systems Machinery Engineering Industry and Trade Inc.S. as it continues its activities. Our company offers its products and experiences to the local market and international market.

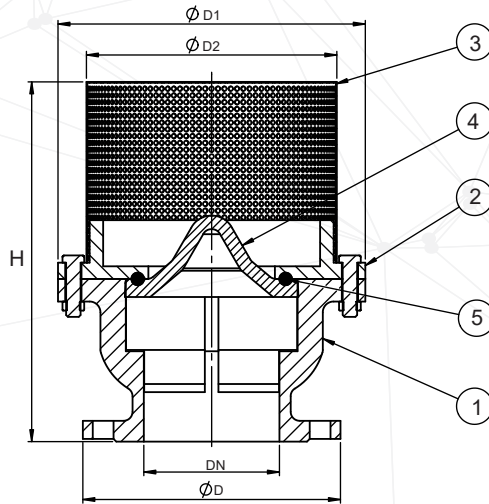

Tayfur water systems, while strengthening its recognition abroad, continues to expand its production, sales and marketing activities every day.

Tayfur water systems, engineers and technical staff, technological infrastructure, manufacturing, sales, Project-consulting, contracting and service planning meets the requirements of the sector.

Our company manufactures Typhoon brand, Hydraulic Control Valves, plastic Hydraulic Control Valves, backwash valves, plastic backwash valves, impact-free dynamic suction cups, plastic suction cups, bottom clamps, filter reverse Flushing Control Devices. It is progressing towards becoming a strong brand in both domestic and foreign markets by meeting the special demands of its domestic and foreign customers.

# FOOT VALVE

Deep well pumps; when the pump starts to work, the air and water in the suction pipe start to move at high speeds. When the water reaches the high-speed suction Valve, the suction Valve is suddenly closed, causing a blow to the system. Because the pulse-free suction fan gradually slows the high discharge rate, it does not reflect the problem to the system.

## MAIN PARTS

#	PART NAME	MATERIAL
1	Body	GGG25 / GGG40
2	Cover	GGG25 / GGG40
3	Filtering	AISI 304 / St-37(Gal)
4	Plug	GGG25 / GGG40
5	O-Ring	NBR / EPDM
